

CHAPTER V

CONCLUSION AND SUGGESTION

A. Conclusion

Based on the research findings in chapter IV, it can be concludes that the result of this research was satisfy. This research was succesful in the effort to increase the students listening skill through total physical response method supported by some others action such as correcting the vocabulary, giving the students reward applying some listening assignments, etc. After conducting the research at MTS Ma'arif 04 Rumbia, the researcher concludes that total physical response could increase students' listening ability. The students so interesting with the method and they can respoding the method well. It could be seen from the improvement of students at each meeting for two cycles. It can be proved by the following facts.

1. First, the improvement of students' average score from pre-test to post-test 1 was 13,23%. Based on the students' average score in pre-test was 56,35 or 6,25% who gained score 70 to 71 or two students pass the KKM to 69,58 or 56,25% (18 students) pass the KKM who got score 72 – 83 in post test 1.
2. Second, the improvement of post-test 1 to post-test 2 was 7,38%, which is the students' average score of post test 1 was 69,23 or 56,25% (18 students) to 76 or (30 students) 93,75% which pass the KKM in post-test 2.
3. Third, the result of students' improvement indicates the score progress in students' focused was 75% to 84,38%, answering question was 56,25% to 78,13%, giving opinion gained 59,38% to 71,88%, asking to teacher was 59,38% to 75% and 100% for students who do the task in cycle 1. In the post-test 2 the students' focused gained score 93,75% to 100%, answering

question was 90,63% to 93,75%, giving opinion gained 84,38% to 87,5%, asking to teacher was 90,63% to 93,75% and students who do the task was 100%.

4. The last fact is based on the teacher's interview result can be concluded that total physical response was very effective to apply in listening.

B. Suggestion

Based on the conclusion of the study, some suggestion will be directed toward the English teacher, the students, and other researcher.

1. To English Teacher

The English teacher in teaching and learning process the teacher should be able to choose an appropriate method which improve the students weaknesses especially in listening and enhance the students' motivation. It will be better if the teacher uses a good method. It is useful to implement total physical response method as one alternative teaching.

2. For the Students

They can use total physical response method to enrich their knowledge in learning English and make the students easier to explore their idea how to response the questions if we do not know how to answer in English we can show it with body movement.

3. For Other Researcher

This research is only aimed at discussing the implementation of total physical response to increase students' listening ability in learning English. The result of this study can be used as a reference for the other researchers.
