

## ABSTRACT

**Husna Nur Azizah NPM. 19250025 An Undergraduate Thesis:** Asatidzah's Efforts in Internalizing the Disciplinary Values of Santriwati Islamic Boarding School At-Tanwir Metro. This undergraduate thesis is under advisory of Heri Cahyono M.Pd.I and Dr. Prabowo Adi Widayat M.Pd.

Every activity at Islamic boarding schools cannot be separated from the rules governing the behavior of all parties in the Islamic boarding school environment, one of which is for students. The rules that apply are closely related to disciplinary behavior which is still a problem in Islamic boarding schools. The main purpose of discipline is to train discipline and instill moral discipline in students who will form patterns of behavior, so that discipline becomes a behavioral control to comply with regulations. The problem that often occurs in the Islamic boarding school environment is the lack of discipline of the students in obeying the rules that apply at the Islamic boarding school. Adolescent association without direction and supervision of behavior will have a tendency to lead to negative association. In Islamic Boarding Schools, the discipline of students is an important factor in supporting the success of Islamic boarding schools. Instilling discipline in students (santri) is not an easy thing. All of this requires motivation and support from any subject matter related to student discipline. In instilling discipline in Islamic boarding schools, it is not enough if you only apply the principles of discipline but need to be figures as role models for their students, the figures in question are Ustadz and Ustadzah who manage and serve at Islamic boarding schools.

The research method used was the case study method. The population in this study were female students at the At-Tanwir Metro Islamic Boarding School, totaling 396 students. This study used the Observation technique, namely visiting the research location at the At-Tanwir Islamic Boarding School, Jl. Proclamation No. 1 16a Mulyosari West Metro and an interview with Asatidzah regarding the efforts made related to research.

The test results show that in field observations of Asatidzah efforts in internalizing the discipline of female students (Santriwati) at the At-Tanwir metro Islamic boarding school, it was found that several efforts were made, including giving warnings and giving punishments according to the level of violations committed. Thus it is concluded that the efforts made by Asatidzah can help in internalizing the discipline of Santriwati At-Tanwir in Metro city.
