

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

The results of the research and discussion show that using the TikTok videos to communicate with students of class XI IPS MAN 1 Metro about the experimental and control teams gave positive results. The researcher carried out several stages in collecting data, starting from the pre-test, treatment and post-test.

The experimental and control groups were given a pre-test. The pre-test results obtained a mean score in the experimental group (5.961), and the control group received a mean score of (6.405). This can be interpreted as the control group scoring higher than the experimental group. The experimental group was superior to the control group for the post-test average score. The experimental group obtained an average score of (7.834) while the control group (7.150). Based on this data, using TikTok videos on students' writing ability influences writing learning, especially writing analytical exposition texts in class XI IPS MA Negeri 1 Metro students. These results can answer the first question in the formulation of the problem.

#### B. Suggestion

TikTok videos influence the writing ability of class XI students at MA Negeri 1 Metro. This statement is based on the results of this study. Below are suggestions from research by researchers :

1. For students, using TikTok video media can make it easier for them to determine ideas and understand the content of the text they will write. The use of TikTok videos can provide broad insight to students so that by watching the TikTok videos, students can offer conclusions that will be registered. For this reason, using TikTok videos helps students have more opportunities to express their writing and makes their learning more fun.
2. For teachers, this research can help teachers determine the suitable learning media for students, especially in learning writing. Using TikTok videos makes it easier for teachers to convey material and makes learning more efficient.

3. For future researchers, future researchers can be more creative in selecting the TikTok videos used. More interesting TikTok videos will make it easier for users to understand ideas and highlight the essential points of the video. Many types of educational media are embedded in the educational model and are believed to provide understanding and support for future generations.
