ABSTRACT

Total heavy equipment work in section 3 is 902 m or 1,713.8 m³. The productivity of the crawler crane is 74.19 m³/hour, the diesel pile hammer is 3.62 m³/hour and the excavator is 115.44 m³/hour. The volume of sheet pile driving for 240 working hours is 345 m or 655.5 m³, excavator excavation is 27,705.6 m³. Cost comparison analysis using field analysis, 2021 Tanggerang district analysis, and 2022 Ministerial Regulation Analysis, field analysis obtained IDR. 25,252,323.76 analysis of Tanggerang district in 2021 obtained Rp. 26,193,513.40 is 3.6% higher than field analysis. analysis of ministerial regulations for 2022 Rp. 25,562,674.32 is 1.2% higher than the field analysis. Analysis of ministerial regulations for 2022 costs Rp. 25,252,323.76, the most efficient and effective currently used at the research location.
