

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

Based on the investigation and discussion in chapter IV, it can be concluded that :

There is any significant influence in students' reading comprehension before and after being taught by using Computer Assisted Instruction (CAI ) at fourth semester in English department Muhammadiyah university of Metro. the mean score of the reading comprehension in the experimental is higher than that of in the control group ( $0.38 > 0.02$ ). It means that teaching advanced reading using CAI gives a significant influence in increasing students' reading comprehension.

In addition , The use of Computer Assisted Instruction ( CAI ) on advanced reading at four semester students' in English departement Muhammadiyah University of Metro is effective to increase reading comprehension. The measurement shows that the increasing line of the reading comprehension of the experimental group after the treatment was higher than that of before the treatment ( $1.36 > 1.74$ ). The t-test measurement obtained (3.079) was higher than that of *t* table (2.02) at the significance level 0.05 and the significance (0.000) was lower than 0.05.

## **B. Suggestion**

Based on the above conclusion, it was suggested:

1. For Lecturer,

Teacher should be able to use various technique to teach English to avoid students of feeling bored in the class. The researcher suggested the teachers to use CAI technique for teaching reading in order to make the students easier understand the reading text.

2. For Students,

CAI is one of technique used to teach reading. The students surely be interested in teaching and learning process because they feel enjoy their study. Students can practice reading by using technology to make it more understand about reading comprehension.

3. Future Researchers,

The researcher knows that this research is far for being perfect. The researcher hopes that this study will be useful for the further researcher to conduct the similar research, especially in using CAI as the technique in teaching reading. This study is expected to give more knowledge about the use of CAI technique in teaching reading comprehension. Furthermore, it is also recommended for the future researchers to use this finding as an additional reference and as a consideration in conducting the next research.
