

ABSTRACT

Sabatini, Bela. 2017. *The Influence of Using Building Word Game Towards Students' Vocabulary Mastery at Accountancy Study Program in Academic Year 2016/2017.* An Undergraduate Thesis English Education Study Program, Teacher Training and Education Faculty. Muhammadiyah University of Metro. Advisor: (1) (2)

Keywords: *Influence, Building word, Vocabulary Mastery*

Language which is a means of human communication consists of words that have structure which is used together by a particular community or country in conventional way. Whenever people think about language, they usually think of mastering vocabulary. It means whenever using language automatically use the words of the language. So, it is crucial for communicator to have large of vocabulary. Having large vocabulary, people can precisely open their ideas in communication. There are some problem formulations in this research those are "How far the students' score in building words game? How far the students' score of vocabulary mastery? How far the influence of building word towards students' vocabulary mastery?"

The objectives of this research are "To find out the students' score of building words game; to find out the students' score of vocabulary mastery; to find out the influence of using building word game towards students' vocabulary mastery."

The kind of this research is quasi experimental design. The research was conducted at Accountancy Study Program in Academic Year 2016/2017. The researcher took all classes at Accountancy Study Program with the total number of the students are 45 students, 23 as the experiment class and 22 were included as control class which were taken by using sample random sampling. In collecting the data, the researcher used pre-test and post-test. In analyzing the data, the researcher used Ttest formula.

After analyzing the result of data by using Ttest formula, the researcher gets the result of t_{ratio} is 2,49 and t_{table} 2,08 (on criterion 1) and 2,00 (on criterion 2). It means that $t_{ratio} > t_{table}$, then the criterion of t_{ratio} is H_a is accepted if $t_{ratio} > t_{table}$. So, there is significant influence of Using Building Word Game Towards Students' Vocabulary Mastery at Accountancy Study Program in Academic Year 2016/2017.
