

## CHAPTER V

### CONCLUSION AND SUGGESTION

#### A. Conclusion

Grammatical and lexical cohesion types in the Q1 album by Gamaliel identified by using Halliday and Hasan theory of cohesion in English. Based on the result, the researcher found 217 items of cohesive devices which consist of 181 references, 1 substitution, and 16 conjunctions in grammatical cohesion. While in lexical cohesion the researcher found 11 reiterations (9 repetitions, 1 synonym, and 1 general word) and 8 collocations. From the data found the researcher concluded that the most dominant types of grammatical cohesion is personal reference with 121 items found or around 55.7% and the most dominant types of lexical cohesion is repetition with 9 items found or around 4.1%.

#### B. Suggestion

In the end of the research, the researcher would like to give suggestions that expected to be useful for the next researcher, English learner and the lecturer.

For the next researchers

The next researchers who interest to do the same field of research can use this research to compare about grammatical and lexical cohesion types found. The researcher also suggests to the next researchers to develop this research, so that this research will be more detailed and specific.

For English learner

The result of this research is expected to help the English learner in understanding cohesion devices especially types of grammatical and lexical cohesion, and the cohesion devices use in the text through the song lyric.

For the lecturer

The result of this research is supposed to be a reference in teaching English, especially for the types of grammatical and lexical cohesion through the song lyric.
