

CHAPTER V

CLOSING

A. Conclusion

Based on the results of research and discussion of "Developing Animation Videos as Learning Media for Students Speaking Ability in Description Text on Junior High School 2 Metro" it can be concluded that:

1. The results of developing animated videos through expert validation on material experts obtained a percentage value of 82% with a very good category. While the media expert obtained a percentage value of 79% with good category.
2. Through the implementation stage of grade VI students at *SMP Negeri 2 Metro*, a percentage value of 82% was obtained from the student response questionnaire in the very good category.
3. Through the implementation stage of grade VI students at *SMP Negeri 2 Metro*, a percentage value of 96% was obtained from the teacher's questionnaire response in the very good category.

B. Suggestion

1. Utilization

- a. Researchers hope that further research can further expand the use of animation videos for learning
- b. The researchers must understand more about a better voice recorder so that a clearer sound is obtained.
- c. The researchers hopes that in the next research, it can make the animation video smoother in making so that it can be more interesting for students in learning activities.
- d. Because the researchers does not implement the product extensively, the researchers hopes that further research on video animation can be implemented extensively in students.

2. Development

- a. Video animation can be developed for other English language materials according to the competencies to be achieved.
- b. Adding some supporting characters so that the animation is more interesting.
