## **ABSTRACT**

Agung Saifudin. NPM 17610111. Factors influencing employee performance in the Department of Women's Empowerment, Child Protection, Population Control and Family Planning (DPPPAPPKB) Metro City. An Undergraduate Thesis. Management Studies Program, Faculty of Economics and Business. Muhammadiyah University of Metro. Advisor (1) H. Suwarto, S.E., M.M. (2) H. Suryadi, S.E., M.M.

This study examines the factors that influence employee performance, including locus of control, leadership style, organizational culture, work facilities, in the office of women's empowerment, child protection, population control and family planning (DPPPAPPKB) Metro City. The analytical method used is quantitative research. The object of this research is an employee who works at the Department of PPPAPPKB Metro City. The total population is 48 respondents—data collection techniques using literature study, interviews, observations and questionnaires. Data analysis techniques using SPSS 20 include testing the instrument requirements test, testing the analysis requirements and testing the hypothesis. The conclusion is that the four variables simultaneously show significant and significant influence on employee performance, so discussing the impact of Locus of Control, leadership, organizational culture, work facilities on employee performance can be significantly related to productivity and progress of government agencies.

**Keywords:** Locus of Control, leadership, organizational culture, work facilities, on performance
